Control Your System

With MyAccess™ Features, you can control your alarm system with your cell phone by sending simple text messages*.

Away/Arm all
Turn all areas of your alarm system on or off

Perim
Arm only the perimeter

Arm [area number]
Arm only selected system areas

Disarm
Turn all areas of your system off

Disarm [area number]
Disarm only selected system areas

Cancel
Turn off an alarm

Status
Ask the system to reply with its status, e.g. Armed, Ready, Alarm and others

Each command received by your system is acknowledged back to you via a return text message.

*Requires purchase of the cellular features from your alarm dealer to activate this option.

MyAccess™
Take remote control of your security system

Manage Your Office Security System 24/7 With Your Cell Phone

People use cell phones to do much more than just make calls. It's their calendar, to-do list, address book, alarm clock and camera. Now you can also use a cell phone to control your office security system.

With the MyAccess™ Features, your facilities manager can control your alarm system from their cell phone via text commands. The most common functions include arming and disarming the system, and checking current status. You can also automatically receive status messages and alarms directly to your cell phone or email, so you always know what's going on at your facility.
